- Stainless steel construction
- Stable for outdoor use
- Heavy duty frame with water filled base

Description/Application

With an image size of 65 square feet, your customers will take notice. The new BillBoard display is perfect for eye-catching large format graphics. BillBoard is the largest portable stand available with an image display size of 6.5 feet high by 10 feet wide. Two or more displays can be connected to hold wider banners (up to 20 feet wide) or use extension kit to expose higher than regular banners (up to 12 feet high).

BillBoard is constructed from stainless steel. Its spring construction withstands breezes and bumping, while its heavy duty water filled base allows for stability indoors and outdoors. It is constructed for use with any type of durable media. Despite its large size and durability, BillBoard requires no tools to assembly. BillBoard is ideal for any users who want high-impact visibility.

BillBoard is the marketing and visual display that gives your company the means to get your name and logo noticed! BillBoard captures the attention of your audience during trade shows, outside store signage, promotional imaging and any other application that requires you to expose the market to your product.
